

The Hill Bill

BLOWER LANDINGS STUCK SWITCH

SIZES	180	188
DIMENSIONS	141-112-129	141-112-129

When the snow's been dumping all-night the HILL BILL is a ski you want in your arsenal. Throw this pair of rednecks in the back of your truck, head up the mountain and you'll have more fun than barn dance with free moonshine.

Plenty of width underfoot and heavily rockered tips provide incredible buoyancy. Camber underfoot keeps the Hill Bill composed on hard and sketchy snow and snappy out of turns.

With STOMP GUARD and ROUND TOP construction the Hill Bills are burlier than a John Deere Tractor.

SHAPE: DIRECTIONAL

CAMBER/ROCKER IDEOLOGY

TECHNICAL KEY FEATURES
