128/96/118

The Rockwell is Darwin's theory of evolution manifest in a ski. Snippets of DNA were taken from skis in the Amplid range and painstakingly combined by the ARC to create the ultimate all-mountain shreds. The responsive and cranky sidecut of our C7 meets the floatation of the Hill Bill and the agility of the Antidogma to create a completely unique ski.

With rocker in the tips, a 96mm waist and reverse sidecut in the nose there's no doubting its powder slaying abilities. Then rip the tight cambered sidecut into hardpack pistes and you'll know you're riding the most complete all-mountain ski on the planet.

SHAPE: DIRECTIONAL

CAMBER/ROCKER IDEOLOGY

TECHNICAL KEY FEATURES

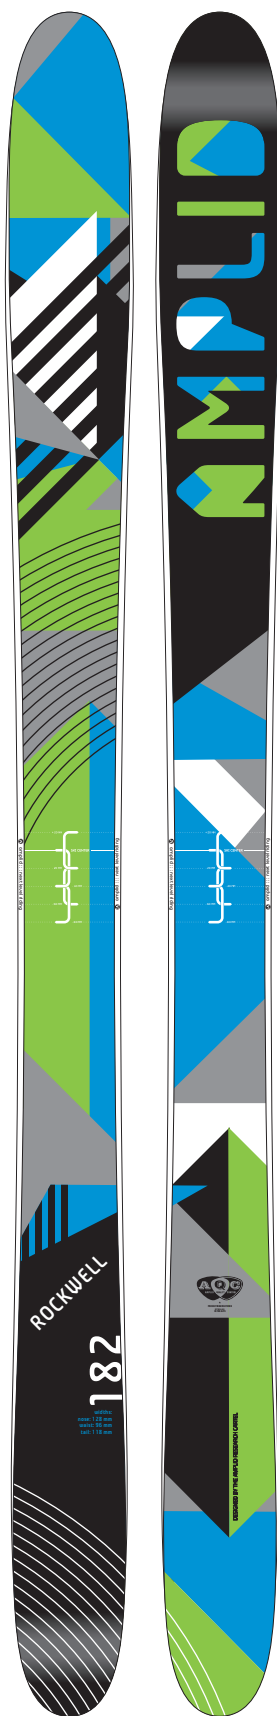

- P10 SUPERLIGHT WOOD CORE
- S-DIM GEOMETRY
- MAGMA EDGE SHOCK ABSORBER
- HORSESHOE STEEL EDGE
- T.P.U. SPIN TIPS
- GLASSFIBER LIGHT BIAx
- MC BEZIER SPLINE SIDECUT
- SHELTER ROUNDTOP CONSTRUCTION
- SINTRUDED 6.6 H.M. BASE
- SHRED READY
