

The Syntax ^{NEW}

ACCELERATE ROTATIONS

SIZES	172	178
DIMENSIONS	119/86/111	119/86/111

We scraped the Hover Ski, sold the Delorian and set to work developing the lightest park ski on the planet... the SYNTAX was born.

HEXO2 Technology makes the Syntax practically weightless: in the tips for unbelievable spin acceleration and under your foot for the easiest handling on earth. The Syntax's Sintered Nano Bases make knuckle landings a forgotten experience. We based the shape on the Antidogma's proven geometry, because some designs are timeless.

The NEW SET OF MOULDS and the modified construction make the Syntax a bit more elastic longitudinally and add more torsional pop. And: The new ROUND TOP construction keeps your skis looking fresh all season.

SHAPE: DIRECTIONAL

POPCAMBER

TECHNICAL KEY FEATURES

- HEXO2 TECHNOLOGY
- SHELTER ROUNDTOP CONSTRUCTION ^{NEW}
- HELIO P15 ULTRALIGHT WOOD CORE
- HEX MAT GLASS EPOXYD MATRIX
- MAGMA EDGE SHOCK ABSORBER
- HORSESHOE STEEL EDGE
- T.P.U. SPIN TIPS
- SILVER FOIL INLAY
- MC BEZIER SPLINE SIDECUT
- SEE THROUGH "GLORY HOLE" TOP SHEET AND BASE
- SINTERED NANO HIGHSPEED BASE/STONE FINISH
- SOFTTOUCH COATING
- SHRED READY
